

QuickFix® 3+ Adapter

Successor: 003-161

014-150

Description

The days when you needed a separate socket for each element of your lighting installation are now finally consigned to history with our design protected QuickFix™ system: Using this connector system, multiple branded 230-volt products may be connected together with no problem – and this is also true for 36-volt products. Each QuickFix™ product is individually quality tested to meet the IP67 rating - seeping moisture presents no danger to its continued operation. The QuickFix™ cable is available in the colors white and black; cables for low-voltage products can be ordered in the colors transparent and green.

Assembly:

230V LED products should always be installed under power as this is the only way to check the polarity. All new products have modified plugs ensuring the correct polarity.
