

LED Dual String Lite® 120

029-660

LEDPL-120-36VTR-WWWH-CC

Description

Product description

Our Dual Color LED String Lite® is available in the length of 12m. String Lite® features points of light fixed directly to the light cable. A string is generally made up of multiple segments. By means of the design protected QuickFix™ system, several segments may be connected together with no problems. The power supply for all the 36V light strings to be connected is provided by a central transformer. The number of light strings which may be connected up is governed both by the rating of the transformer selected and the maximum length of a decoration string. Dual Color LED String Lite® comes with 120 shining points of LED light. Each segment can be individually replaced.

Decoration solutions

String Lites® with their myriad tiny points of light give the observer a lively, fun and atmospheric impression. This professional choice for light strings, is perfectly suited for the decoration of trees, shrubs and bushes. It is also very popular for window frames and outline decorations, e.g. gables and balconies. The LEDs are available in different color combinations.

Dual Color System

The two possible colors of each Dual Color String Lite® color combination can be switched manually via a Dual Color Polarity Adapter or Dual Color Polarity Switch and automatically via a Low Voltage Controller Pre-Programmed RTC or Low Voltage Controller DMX.
